FOR A CONSTANT IMPROVEMENT

SINCE 1978

CAST S.p.A. has been founded in Torino in 1978 for manufacturing and sales of high pressure carbon and stainless steel tube fittings

THE CAST GROUP

CAST S.p.A. is a company in continuous growth, among the most prestigious ones of the European hydraulic markets.
The productive plants are concentrated Casalgrasso (Cuneo). Up to date CAST owns covered surfaces larger than 18.000 m2, with an overall land of 35.000 m2 and is, employing about one hundred and fifty people with a constantly increasing turnover..

KNOW HOW AND RESEARCH

The high technical Know How, due to a constant application in Research and Development, has leaded CAST S.p.A. to great improvements to the standard products. Our production derives from strict international norms and a rigorous production make CAST fittings a winner product in all applications, especially where absolutely reliable material is requested. Both in Italy and abroad, wherever our product has been used, we have experienced a success that has let us enter the Vendor Lists of worldwide known O.E.M.s.

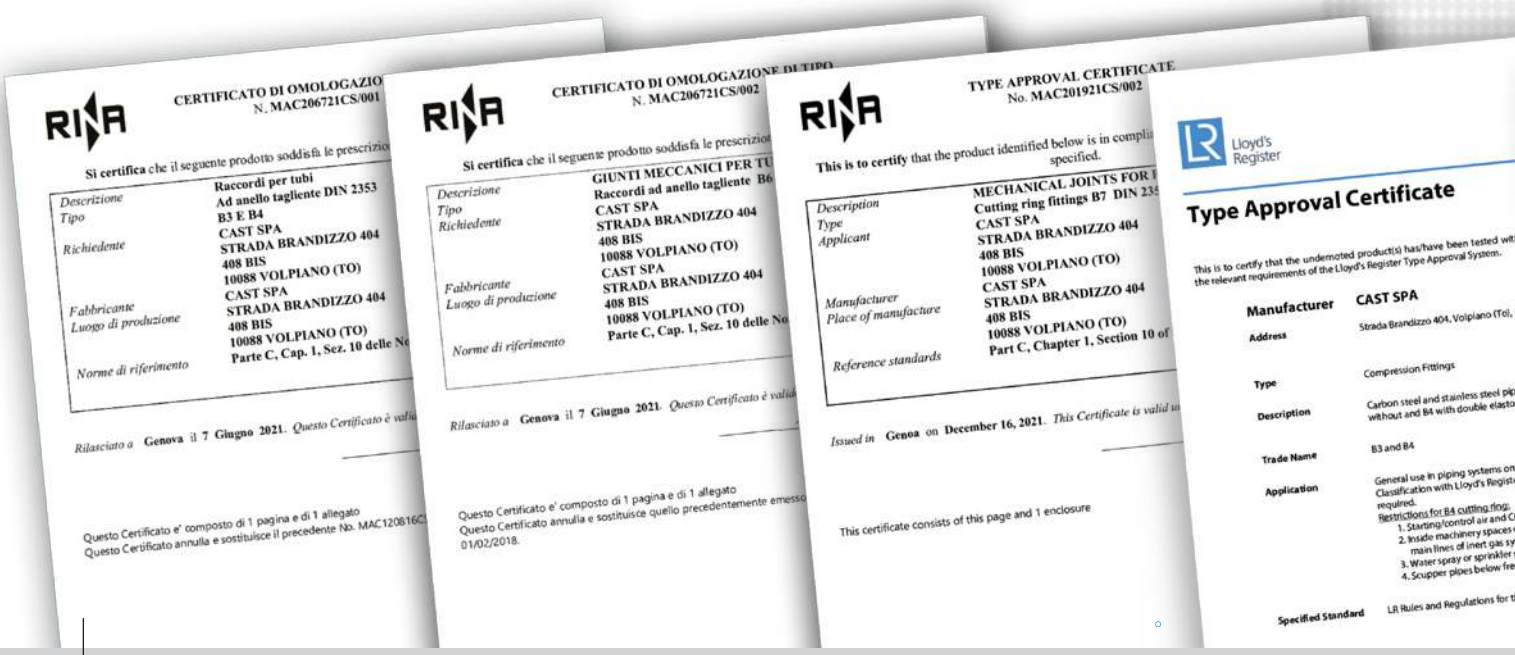
CUSTOMER CARE AND QUALITY SERVICE

The CAST S.p.A. service, via a series of highly detailed technical-informative catalogues and specifically trained consultants, provides clear and effective answers, all under the constant supervision of our Quality Service.
Where necessary, CAST S.p.A. intervenes personally, promptly sending its own specialised technicians anywhere in the world.

CAST THE QUALITY

CERTIFICATIONS

Certifications are issued by authorised external bodies, confirming that the company's quality system or product complies with certain regulations.
Cast's integrated Environment-Quality-Safety Management System complies with the current UNI EN ISO 9001, ISO 14001 and BS OHSAS 18001 standards.



CERTIFICAZONE PRODOTTO - Sistema Ingrato Gestione Qualità - B3-B4-B6-B7

STAINLESS STEEL PIPE FITTING

Thanks to new technologies, this particular type of steel has now entered the most various industrial sectors, especially into those of advanced technology: as for instance, chemistry with all the problems given by different fluids that create the final process; or components for instruments with the problems regarding the purity of the fluids used to control compli-cated machinery; or gas pipelines, with problems with temperature and working stress; or Nuclear Power Plants, Aviation and Navy. These and many other sectors as important as these ones, led us to take care, primarily, since a few years, of the problems of this particular product. We are therefore glad to be able to put this catalogue at your disposal, to enable you to choose the parts required for every application. All fittings and valves recalled in this catalogue can be delivered in the various types of stainless steel available on the market.

CARBON STEEL PIPE FITTING

This type of fitting has been used since many years in every kind of industrial application, to the full satisfaction of users through out the world. The casting technology assures a constant quality of the raw product in general and of the specific steels required for specific purposes in particular. The machinability of this steel gives no problems for the manufacturing of the final product. Protective treatments introduced only recently have relaunched the employ of this steel for applications which not long ago were deemed as not possible. We are therefore glad to be able to put this catalogue at your disposal, to enable you to choose the parts required for every application. All fittings and valves recalled in this catalogue can be delivered in the various types of carbon steel available on the market.
